Chain Reaction Innovations is a two-year program for entrepreneurs focusing on energy and science technologies.

Through an annual nationwide application call and competition, four to six teams/individuals are selected to join CRI. They are supported full-time with laboratory tools and seed capital as well as technical, business and manufacturing expertise to rapidly mature their early-stage technologies.

**BENEFITS**

- Argonne National Laboratory offers innovators access to state-of-the-art equipment and world-class expertise
- Support obtaining additional funds for tech acceleration
- Up to $220,000 in non-dilutive support for de-risking technical innovations
- One-on-one research mentorship by an Argonne scientist
- Over $100,000 per year for stipend and benefits, including a travel allowance
- Advisory network of regional and national business mentors, commercial partners and investors
- Potential collaborations with Argonne’s 1600 scientists
